

Specifications IW4G

The IW4G is based on the previous versions IW1 and IW2 but, the IW4G has the revolutionary option to live stream video (and audio) real time over a 4G network without any un-save cables or external units. This allows you to monitor, guide and counsel your staff real time from the command centre. Needless to say that this feature can really save lives in case of an emergency.

The IW4G is equipped with a alarm button which can be pushed in case of an emergency. Thanks to the changeable battery combined with a built-in battery you will never go out of power, you can (hot swap) change batteries while filming or livestreaming.

The "man down" function will start recording automatically in case a soldier starts running, gets into a fight or falls down and he/she didn't have the chance to push the record button. Combined with its two-way audio function this camera is the most complete bodycam available on the market.

Video	
• Resolution	up to 1080 (50fps)
• format	MP4
Lens field of view	up to 130 degrees (adjustable)
Watermark on video	Yes
Snapshot function	yes (JPEG)
Camera	
• Password protected	yes
• Pre-record (with audio)	Yes
• Post record (with audio)	yes
• One touch recording	Yes
• Infrared	yes
• Flashlight	yes
• Wifi	yes
• File tagging	yes
• 4G live streaming	yes
• Ptt function (push to talk)	yes
• UV light (for document validation)	yes
• Secure videostorage on camera	yes
• GPS (GEO tagging)	Yes
• GPS (real time)	yes
• Audio message	yes
• Weight (grams/ounce)	167/5,89
• Waterproof	IP67
• Memory	32G (secured), max 168G
Battery	
• Battery life	non-stop (removable battery, 10 min internal battery), hot swappable
• Charging time	4-5 hours
Software	
• Local/server	yes
• Cloud	yes
• Encrypted	yes
Accessories and mounts	multiple accessories, mounts and docks available (multidocks up to 10 cameras)
